-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 June 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 3-6, 25, 29 and 31 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Buckley '377, of record.

Member 30 for example defines a recess in the bottom wall if the container of Buckley with grooves 32 and 34 at an angle and receiving the thumb as shown in Figure 6. The container of Buckley is clearly capable of holding a beverage such as when making eggnog. To have provided only one groove and forgo the advantage of left and right hand use would have been no more than an obvious elimination of a part and it's function.

2. Claims 7 and 8 remain are rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claim 1 above, and further in view of Fulcher et al '350, of record.

To have connected the grooves to form one continuous gripping recess for ease of use in the manner taught by Fulcher et al at 4 would have been most obvious. The feature 5 of Fulcher et al is considered to define an inverted V.

3. Claim 28 remains rejected under 35 U.S.C. 103(a) as being unpatentable over the reference as applied to claim 1 above, and further in view of Tardif '452, of record.

To have further provided the container of Buckley with upper walls that are tapered for ease of pouring would have been obvious in view of such teaching by Tardif at 20.

Art Unit: 3727

4. Claims 9-12 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 13-24, 26, 27 and 32 are allowed while claim 2 has been canceled.

6. Applicant's arguments filed 6/30/06 have been fully considered but they are not persuasive. Applicant's argument that a bowl is not a container is not convincing in view of references to the contrary, see for example Tupper and Lindstrom. By applicant's definition a glass or a cup would not be a container either. However prior patents show that bowls are indeed considered to be container. Furthermore applicant provides a rather curious definition of a cavity and recess. Again prior art shows the terms as alternatives for the same construction, see for example Scarrott et al.

Applicant's definition of cavity would preclude that commonly accepted for dental caries.

7. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
